

Mandatory masking continues at Oak Valley Health

June 9, 2022

Oak Valley Health, which includes Markham Stouffville Hospital, Uxbridge Hospital, and our Reactivation Care Centre, will continue to require mandatory masking past June 11.

Mandatory mask requirements continue to offer additional protection to some of our most ill, injured, and vulnerable patients. To ensure the safest possible environment for our patients and our health care workers to receive and provide care, every person that comes into our hospitals is required to wear a mask. Individuals will be given a new surgical mask to be worn at all times. Personal or cloth masks are not permitted at our hospitals. These measures will remain in effect for the foreseeable future.
