Cardiac Device Clinic

Diagnostic Services

About the Cardiac Device Clinic:

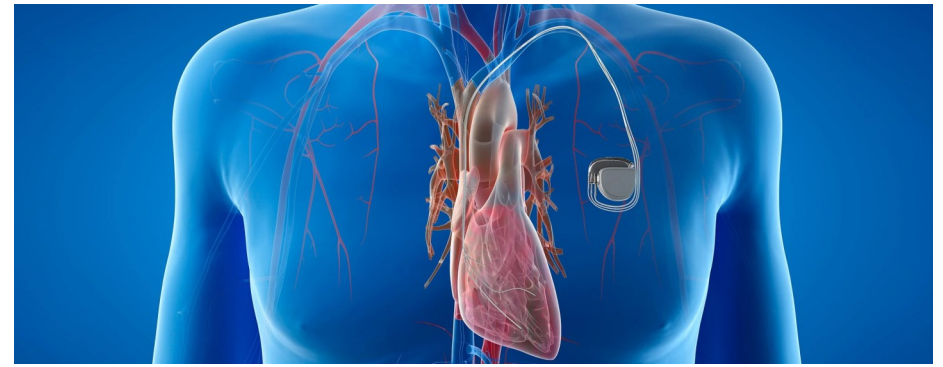

The Cardiac Device Clinic is dedicated to providing care for patients with implanted pacemakers. The goal of the clinic is to ensure that patients with pacemakers have devices that function properly.

The clinic is staffed with skilled cardiology technologists, and cardiac device specialists, who specialize in arrhythmia devices, who work along side cardiologists, who are experts in the arrhythmia and pacemaker fields.

During the visit, a patient may undergo a variety of testing to ensure their pacemaker is performing properly. This **may** include:

- ECG (Electrocardiogram)
- Chest X-ray
- ECHO (Echocardiogram)
- Blood pressure
- Laboratory work
- Pacemaker testing
- Clinical assessment
- Battery check
- Site check
- Cardiologist consults
- Confirmation of next follow—up appointment

Please refer to our website for additional information.

What to bring to your appointment:

- Valid health card
- List of current medication
- Pacemaker identification card
- Name and contact of your cardiologist
- Translator if needed

Things to consider:

- Ensure the clinic is aware of any changes to your health or pacemaker insertion site.
- Inform your health care team that you have a pacemaker, especially if you are having any treatments or surgery.
- Use a cellphone on the side of your body opposite to the side with the pacemaker.
- If having an MRI/X-ray – please inform your health care team.
- Inform the dentist that you have a pacemaker.
- When travelling by airplane, inform airport security.
- Always carry your pacemaker identification card with you.
- Pacemakers can last anywhere from 5-10 years.
